PRODUCT REQUIREMENTS DOCUMENT

PRD Template · A reusable, fill-in document for product teams

A structured starting point for documenting a product idea, user needs, scope, requirements, and acceptance criteria.

DOCUMENT FIELD	FILL IN
Product / Project Name	_____
Company / Client	_____
Document Owner	_____
Version	_____
Status (Draft / Review / Approved)	_____
Last Updated	_____

How to use this template

1. Replace every bracketed prompt or blank line with confirmed information.
2. Write TBD when a decision is unknown; do not invent requirements.
3. Mark optional sections as N/A when they do not apply.
4. Keep requirements specific, testable, and traceable to a business or user need.
5. Review the document with the client and record approvals and changes.

Template only — it contains no assumed product features or client decisions.

Document Control

Use this section to track document changes and decisions.

Version	Date	Author	Change Summary	Approval
0.1	_____	_____	Initial draft	_____
___	_____	_____	_____	_____
___	_____	_____	_____	_____

Stakeholders

Name / Role	Responsibility	Involvement / Approval

Contents

1. Product Overview
2. Problem Statement & Opportunity
3. Goals and Success Metrics
4. Users and Stakeholders
5. Scope
6. User Journeys and Use Cases
7. Functional Requirements
8. Non-Functional Requirements
9. UX / UI and Content
10. Data, Integrations and Dependencies
11. Assumptions, Constraints and Risks
12. Acceptance Criteria and Release Readiness
13. Open Questions and Decisions
14. Appendix / Glossary

1. Product Overview

1.1 Product summary

Describe the product in 2–5 sentences. What is it, for whom, and what does it help them do?

1.2 Background / context

What led to this request? Include relevant business or customer context.

1.3 Product type and platforms

Platforms, devices, regions, languages, and delivery model — only if confirmed.

1.4 Definitions and terminology

Define domain terms, abbreviations, and phrases that could be interpreted differently.

2. Problem Statement & Opportunity

2.1 Problem statement

Who experiences what problem, in which situation, and why does it matter?

2.2 Evidence / research

Customer interviews, support requests, analytics, market research, or other evidence. Note source and date.

2.3 Current alternatives

How do users solve this today? What limitations have been validated?

3. Goals and Success Metrics

3.1 Product goals

What outcomes should the product create? Separate desired outcomes from features.

3.2 Success metrics

Metric	Definition / Formula	Baseline	Target	Timeframe / Source
_____	_____	_____	_____	_____
_____	_____	_____	_____	_____
_____	_____	_____	_____	_____

3.3 Non-goals

What outcomes or capabilities are explicitly not part of this release?

_____

_____

4. Users and Stakeholders

4.1 User groups / personas

User group	Needs / tasks	Context	Evidence / confidence
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____

4.2 Stakeholder needs

List stakeholder roles and their goals, concerns, and decision authority.

_____

_____

4.3 Accessibility / localization needs

Record confirmed requirements for accessibility, languages, locale, or regional use.

_____

_____

5. Scope

5.1 In scope

ID	Capability / deliverable	Reason / linked goal	Priority
IN-01	_____	_____	_____
IN-02	_____	_____	_____
IN-03	_____	_____	_____

5.2 Out of scope

Item	Reason / deferral	Revisit trigger (if any)
_____	_____	_____
_____	_____	_____

5.3 Release / phasing

Define MVP or release boundaries only after they are agreed.

_____

_____

6. User Journeys and Use Cases

Use a separate entry for each important journey. Link each journey to the requirements it supports.

Field	Details
Journey / use case ID	_____
User and goal	_____
Preconditions	_____
Trigger	_____
Main flow	1. _____ 2. _____ 3. _____
Alternative / error flows	_____ _____
Expected outcome	_____
Related requirements	_____

Additional journeys

Duplicate the use-case table for further journeys.

_____

_____

7. Functional Requirements

Write one requirement per row. Make it unambiguous and verifiable. Avoid describing implementation unless it is a confirmed constraint.

ID	Requirement statement	Priority	Source / rationale	Acceptance reference
FR-001	The system shall _____	___	_____	AC-___
FR-002	The system shall _____	___	_____	AC-___
FR-003	The system shall _____	___	_____	AC-___
FR-004	The system shall _____	___	_____	AC-___

Business rules

Rules, calculations, permissions, validation, state transitions, or exceptions confirmed by the client.

_____

_____

_____

Roles and permissions

What each user role can and cannot do, if applicable.

_____

_____

8. Non-Functional Requirements

Record measurable quality requirements only when they are relevant and agreed. Do not treat examples as defaults.

Area	Requirement / measurable threshold	How it will be verified
Performance	_____	_____
Security / privacy	_____	_____
Reliability / availability	_____	_____
Accessibility	_____	_____
Compatibility / devices	_____	_____
Maintainability / observability	_____	_____
Legal / compliance	_____	_____

Other quality requirements

Include only relevant requirements such as offline behavior, backup, or data retention if confirmed.

_____

_____

9. UX / UI and Content

9.1 Design references

Links to approved designs, prototypes, brand guidelines, or reference products.

9.2 Screens and states

List required screens and relevant loading, empty, success, error, and offline states.

9.3 Content and notifications

Copy ownership, notification rules, content sources, and approval process if applicable.

10. Data, Integrations and Dependencies

10.1 Data handled

Data items, purpose, source, sensitivity, retention, and deletion needs where applicable.

10.2 External systems / APIs

System, purpose, owner, interface, access requirements, and known limitations.

10.3 Dependencies

People, vendors, services, approvals, hardware, or decisions needed before delivery.

10.4 Migration / import / export

Existing data and any confirmed migration or portability needs.

11. Assumptions, Constraints and Risks

Type	Description	Impact	Owner / next action	Status
Assumption				
Constraint				
Risk				
Risk				

Risk response / mitigation

How will significant risks be reduced, monitored, or accepted?

12. Acceptance Criteria and Release Readiness

Use testable Given / When / Then criteria where helpful. Each criterion should be observable and linked to a requirement.

AC ID	Given (context)	When (action)	Then (expected result)	Req. ID
AC-001				
AC-002				
AC-003				

Release checklist

Testing, accessibility, security/privacy review, analytics, support, documentation, and approvals as applicable.

Definition of Done

What must be complete before the work or release is considered done?

13. Open Questions and Decisions

ID	Question / decision	Owner	Due date	Status / outcome
Q-001	_____	_____	_____	_____
Q-002	_____	_____	_____	_____
D-001	_____	_____	_____	_____
D-002	_____	_____	_____	_____

Items awaiting client confirmation

Keep unresolved requirements visible. Record who will answer and by when.

_____

_____

14. Appendix / Glossary

Glossary

Term, abbreviation, definition, and owner/source if relevant.

_____

_____

_____

References

Links to research, meeting notes, approved designs, contracts, and related documents.

_____
